

JULIUS MERZLIKINAS

TRUST & SAFETY | AI WORKFLOW AUTOMATION | ONLINE PLATFORM SAFETY

Kaunas, Lithuania | LinkedIn: [linkedin.com/in/julius-merzlikinas-761157294/](https://www.linkedin.com/in/julius-merzlikinas-761157294/) | Portfolio: lorin-jm.github.io

PROFESSIONAL SUMMARY

Trust & Safety professional working on the Vinted account at Transcom, reviewing user activity, transactions and conversations to identify scams, protect users and maintain platform integrity. Interested in where AI can take repetitive work off moderators' hands, and where it shouldn't be trusted to decide: recently designed, built and tested an AI-assisted report triage prototype with Claude. Previously a Customer Success Manager in a cybersecurity-focused company. Analytical, detail-oriented and comfortable with sensitive, ambiguous situations.

PROJECTS

TRUST CONSOLE - AI-ASSISTED REPORT TRIAGE

Personal project | 2026 | lorin-jm.github.io

- Built a working moderation console prototype in which Claude recommends one notice per report and the agent makes the final call, with pre-approved notice wording, flagged images blurred by default and a full audit log.
- Decided where AI adds value and where plain automation is enough: AI reads conversations; rules and automation handle spam signups, keyboard shortcuts, logging and timers.
- Wrote a 30-case test set with an answer key and improved the prompt over four versions, reaching 30/30 defensible answers, 8/8 false reports correctly closed and 0 actions against innocent users.

PROFESSIONAL EXPERIENCE

TRANSCOM

Junior Content Trust & Safety Specialist | Client account: Vinted | June 2025 – Present

- Monitor and review user activity, transactions, conversations and platform content to identify scams, suspicious behavior, policy violations and other safety risks on the Vinted marketplace.
- Investigate scam attempts and potentially harmful activity, assessing individual cases and user behavior against applicable policies and safety standards.
- Review complex and sensitive cases involving users, transactions, communications and potential abuse of the platform.
- Analyze patterns of user behavior and suspicious activity to identify recurring abuse trends and emerging risks.
- Make risk-based decisions by weighing context, evidence, user behavior and potential impact on the platform and its users.
- Handle sensitive user information and high-impact cases with accuracy, confidentiality and professional judgment.

CYBERCARE

Customer Success Manager | October 2023 – September 2024

- Managed customer relationships in a cybersecurity-focused environment, acting as the key point of contact throughout the customer journey.
- Identified customer problems and their underlying causes, and delivered appropriate, solution-oriented fixes.
- Handled challenging customer situations while staying calm, professional and customer-focused.
- Collaborated with internal teams so customer needs and issues were communicated clearly and resolved on time.

CORE COMPETENCIES

Trust & Safety	Content Trust & Safety · Online Platform Safety · Scam & Fraud Detection · Risk Assessment · User Safety · Content Review · Policy Enforcement
